FIELD OF SPECIALIZATION

The focus of my research is to provide a biophysically based, mechanistic understanding of neuronal processes supporting cognitive functions of the mammalian brain, such as episodic learning, memory, and decision-making. My lab is using the mouse as a model organism, where synaptic, cellular, and microcircuit processes can be causally linked to evolutionally conserved adaptive behaviors under both normal and diseased conditions, such as epilepsy, schizophrenia, and aging. My prior experimental work established dendrites as independent computational units of principal excitatory neurons (Losonczy and Magee, *Neuron*, 2006; Losonczy et al., *Nature*, 2008; Losonczy et al., *Nature Neurosci*, 2010). Research in my own lab aims to dissect the role that excitatory, inhibitory, and neuromodulatory circuit motifs play in learning and memory formation. For this, we use large-scale, subcellular-resolution *in vivo* functional imaging in combination with electrophysiology, cell-type specific manipulations, *in vitro* experiments, and computational modeling. My work has provided the first evidence for the functional dissociation of inhibitory circuits in regulating neuronal input-output transformations *in vitro* (Lovett-Barron et al., *Nature Neurosci*, 2012). Subsequent series of *in vivo* imaging studies aimed at dissecting hippocampal circuit operations *in vivo*. For example, we characterized the type of information carried by septal GABAergic (Kaifosh et al., *Nature Neurosci*, 2013) and locus coeruleus catecholaminergic (Kaufman et al., *Neuron*, 2020) inputs to the hippocampus at a single synapse-level *in vivo*, dissected the roles of identified hippocampal inhibitory circuits during navigation, reward and fear learning (Lovett-Barron et al., *Science*, 2014, Lee et al., *Neuron*, 2014; Basu et al., *Science*, 2016, Turi et al., *Neuron*, 2019, Geiller et al., *Neuron*, 2020). In another series of studies, we characterized ensemble dynamics of several types of developmentally- and genetically defined principal cells (Denny et al., *Neuron*, 2014; Danielson et al., *Neuron*, 2016a, 2016b, 2017; Zaremba et al., *Nature Neurosci*, 2017) during navigation and learning. In a recent series of studies, we uncovered novel circuit mechanisms of episodic memory formation (Geiller et al., *Nature*, 2022) and consolidation (Grosmark et al., *Nature Neurosci*, 2021, Terada et al., *Nature*, 2022). Another line of research in my lab is focused on synaptic and subcellular mechanisms of learning (O'Hare et al., 2022, *Science*; Rolotti et al., *Neuron*, 2022; Gonzalez et al., *Nature*, 2024). I also investigated how the fundamental processes of learning and memory are disrupted under pathological conditions, including schizophrenia (Zaremba et al., *Nature Neurosci*, 2017) and temporal lobe epilepsy (Sparks et al., *Nature Commun*, 2020). To aid these investigations, my lab has developed several novel methods for anatomical and functional circuit mapping (Reardon et al., 2016, Geiller et al., 2022) and introduced novel frameworks for computational modeling of dendritic operations and circuit dynamics (Ahmed et al, *Neuron*, 2020; Turi et al., 2019, Kaifosh et al., *Neuron*, 2016; Liao et al., *Nature Neurosci*, 2024). I have established successful collaborations with other cellular-circuit and systems neuroscientists (I. Soltesz, Z. Nusser, G. Buzsaki), computational and theoretical neuroscientists (S. Fusi, Y. Poirazi, and L. Paninski), molecular neuroscientists (B. Zemelman, F. Polleux, R. Hen, I. Spiegel), and optical physicists (A. Vaziri, M. Schnitzer, D. Peterka), among others, to develop integrated experimental approaches and theoretical frameworks for investigations into cognitive memory functions under normal and pathological conditions. The following publications from my laboratory exemplify my scientific approach:

A. EDUCATION

University Medical School, Pecs, Hungary M.D., 1993 – 1999

Semmelweis University, Budapest, Hungary Ph.D., in Neurobiology, 2000 – 2004
 Dissertation title: *Underlying mechanisms of short-term synaptic plasticity at identified central synapses.*
 Dissertation advisor: Prof. Zoltan Nusser

B. POSITIONS HELD SINCE MEDICAL DOCTORATE CONFERRED

09/1993 – 09/1999	University Medical School, Pecs, Hungary <i>Research Assistant</i> (Prof. G. Lazar, Dept. of Anatomy)
10/1999 – 03/2000	University Medical School, Pecs, Hungary <i>Graduate student</i> (Prof. L. Seress, Central Electron Microscope Laboratory; Prof. G. Czeh, Dept. of Pharmacology)
04/2000-07/2000	MRC Anatomical Neuropharmacology Unit, Oxford, UK, <i>Visiting student</i> (Prof. P. Somogyi)
08/2000 – 07/2003	Semmelweis University, Budapest, Hungary <i>Graduate student</i> (Prof. Z. Nusser, Institute of Experimental Medicine)
08/2003 – 07/2006	Louisiana State University, Neuroscience Center, La, USA <i>Postdoctoral Fellow</i> (Prof. J. C. Magee)
08/2006 – 04/2007	Yale University, Department of Cell Biology, CT, US <i>Postdoctoral Fellow</i> (Prof. G. Miesenbock)
05/2007 – 10/2009	Howard Hughes Medical Institute, Janelia, Va, USA <i>Research Specialist</i> (Prof. J. C. Magee)
11/2009 – 4/2016	Columbia University, Department of Neuroscience, NY, USA <i>Assistant Professor</i>
10/2010 – present	Kavli Institute for Brain Science, Columbia University, NY, USA <i>Faculty Member</i>
07/2015 – present	Mortimer B. Zuckerman Mind Brain Behavior Institute, Columbia University, NY, USA <i>Faculty Member</i>

04/2016 – 12/2018 Columbia University, Department of Neuroscience, NY, USA
Associate Professor (with tenure)

01/2019 – present Columbia University, Department of Neuroscience, NY, USA
Full Professor (with tenure)

C. TEACHING EXPERIENCE

C.1 Courses Taught

Synaptic Transmission & Plasticity (doctoral course; instructor, 2012–2018, co-director 2018–2022)
Issues in Neural Circuitry (doctoral course; co-director, instructor, 2011, 2014)
Survey of Neuroscience (doctoral course; lecturer, 2010–present)
NRSA grant writing course (doctoral course, 2018–present)
Neuroscience Section of “The Body in Health & in Disease (medical student lecture, fall 2015, 2016, 2017)
MD-PhD research seminar series (lecturer, 2011–present)

C.2 Mentoring Experience

† denotes student/postdoc in applying for successfully funded fellowships from the National Institute of Health, National Science Foundation, Howard Hughes Medical Institute, or other private foundations.

Postdoctoral Researchers

<u>Dr. Satoshi Terada</u> † (2018–present)	JSPS Fellow, Uehara Foundation, NARSAD-BBRF
<u>Dr. Stephanie Herrlinger</u> † (2019–present, with J. Gogos)	DSPAN-K00, Burroughs-Wellcome PDEP Award
<u>Dr. Eunji Kong</u> † (2022–present)	Korean Government Foundation Fellowship
<u>Dr. Hyun Choong Yong</u> (2023–present)	
<u>Dr. Yu Xin</u> (2023–present)	
<u>Dr. Ivan Voitov</u> † (2023–present)	HFSP Fellow
<u>Dr. Asako Noguchi</u> † (2023–present)	HFSP Fellow, JSPS Fellow
<u>Dr. Lidor Spivak</u> (2024–present, with N. Sawtell)	
<u>Dr. Hayley Bounds</u> (2024–present, with S. Fusi)	Schmidt Fellowship, Kanzer Fellowship

H. SERVICE

1. University/Department Service

Neuroscience Seminar Series committee (member, 2012–13, co-chair 2014 – 2017)
 Neuroscience Faculty Search committee (member, 2010, 2016–2020)
 Neuroscience Doctoral Program Open House committee (member 2013–2017)
 Institutional Animal Care and Use Committee (member, 2016–2023)
 Institutional Biosafety Committee (member, 2017–2022)

Thesis/Qualifying Exam committees are listed in section “C.2. Mentoring Experience” above.
